

Welcome to The DRep Collective

Meeting #6

Highlights From Last Meeting

1. Identified leads and contributors for each workstream
2. Agreed to return next week with initial plans of action for each workstream
3. Reviewed current progress on the site.

Agenda

1. Workstream updates
 - a. Briefly review plans for each workstream
2. General agenda items
 - a. . Developer Update

Introductions

Workstream Updates

Kevin

Coordination

Oversees cross- team communication, tracks milestones, and ensures priorities stay aligned.

Updates

- Moderation Setup
- Github work with Ratio
- Check in on Development Team.
- Consolidation of Minutes on Github

What's next

- Drop the Ecosystem Map & Mint
- Promotional Campaign

Needs

- Funds lol, everyone needs this.
-

Metadata Standards

Defines and refines how dRep data is structured, stored, and shared for consistent governance tools.

Updates

-

What's next

-

Needs

-
-

Ben

Ecosystem Mapping

Catalogs and visualizes all dReps, initiatives, and related projects so voters can easily navigate and connect.

Updates

-

What's next

- Write a creative design brief on what we are doing.
- Follow up with the core builder group to check.

Needs

- Do not over commit or over promise
-

Matthew

Partnerships

Builds and maintains relationships with external collaborators—identifying new opportunities and integrating them into the project's growth.

Updates

- .

Notes

- Socializing with relevant Intersect committees.
 - A proposal for potential funding.
- Potential
 - maybe SPOs
 - maybe dao builders
- Hawaiian Blockchain Summit (Sep)
 - potential connection with Rare Bloom

What's next

- identify existing partnerships
- identify with each ws owner what partnerships they need

Needs

- Help with identifying existing and needed partners.
-

Matthew

Media and Socials

Manages community outreach and updates (social media, announcements, etc.) to keep stakeholders informed and engaged.

Updates

- We've begun posting after-call on the DRep forum.

What's next

- More advance warning on the meetings with addevent publicization.
- Funneling people to the github for contributions.

Needs

-
-

Alpine

Front End

Designs and develops the user-facing interface, focusing on clarity, usability, and a smooth experience for ADA holders.

Updates

-

What's next

-

Needs

-
-

Dagwell

Back End

Implements the server- side logic, database schemas, and APIs that power the governance tools and data flows behind the scenes.

Updates

-

What's next

-

Needs

-
-

Github and Archiving

Oversees version control and code repositories, produces user and developer guides, and maintains accessible archives of all project assets for easy retrieval and historical reference.

Updates

- CURRENT PROGRESS:
- Created FORMS in both the Issues and Discussion sections of the DRep Collective
- location of all Discussion form templates
- location of all Issue templates
- see links here
- and here
- Update the Landing's README.md to reflect the new capabilities of reporting, joining, and developer feedback
- Updated slides and minutes

What's next

- WHAT'S NEXT?
- Clean up the Discussion section -- consolidate the team categories
- Clean up the Landing README.md
- work on navigation
- Generate non-Google slide templates
- Walk community through how to use the forms created above, if necessary
- Fork over front-end repo from Alpine
- Check for database integrations within GitHub or other capabilities
- Continue reviewing GitHub capabilities
- "All provided community links should point to GitHub as GitHub is the central "data broker" for The DRep Collective.

Needs

- community needs to get onboard using GitHub to its fullest capabilities until the community builds needed platforms or other self-hosted open-source products become available and tested for integrations and capabilities, to include consideration on overhead cost of self-hosting.
- Need to make things public.

1. Minting plan?
- 2.

General Items

Template

Template

Permanent Data

- Finalized Votes (Voting App)
- DRep I.D. (NFT)
- Wallet I.D (NFT)

Data that Changes

- Smart contract to be able to represent a vote yes or no with a datum. (Voting Tool)
- Stamps on Passport (NFT)

Not Sure Yet

- DRep I.D. as Passport Name?
- Mintable Map/Airdrop

How Will it Work Simplified

The DRep Collective

Page 17 17

Problem Statement

Cardano's ecosystem faces a human interoperability challenge as it transitions to full self-governance. The core issue: How can community members, especially potential Decentralized Representatives (DReps), effectively represent and contribute to a community they can't fully see or understand?

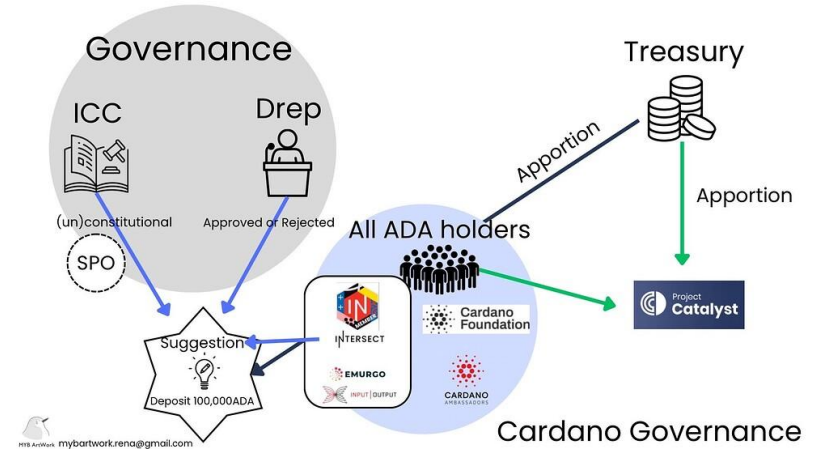

Problems

Lowest visibility: DReps struggle to engage with unknown community members

Representation dilemma: Difficulty in representing an increasingly understood community

Increasingly less DReps' understanding is often restricted to their immediate network, influenced by factors including region, language and the roles in the industry the DReps play

Role ambiguity: Unclear delineation of DRep responsibilities within the ecosystem

https://docs.google.com/document/d/1q05tUZoq-A_txfyl-gBy2G8eaHdEAAFFTAfXdbopWI0/edit?tab=t.0#heading=h.o2hakhtse2v

<https://forum.cardano.org/t/human-interoperability-metadata-standards-and-ecosystem-maps-do-we-need-a-set-of-metadata-standards-and-definitions-for-defining-ecosystem-roles-relationships-and-sectors/135155/37?u=benohanlon>

Metadata

Cip - 0119, how it is currently structured:

01

Metadata Standards

- CIP - 0119
- CIP -1694
- CIP - 0100 (Expand Upon)
- Base Layer vs Changeable Layer

02

Ecosystem Map

+

- Interactive Map
- Educational & Informative
- Corresponds to various Gov actions on gov.tools
- Updated Yearly or Quarterly as needed
- Human Sensory Networks
- Airdrop

03

Voting Passport

+

- Stamps for Voting
- Stamps for different ecosystems explored
- Annually Renewed

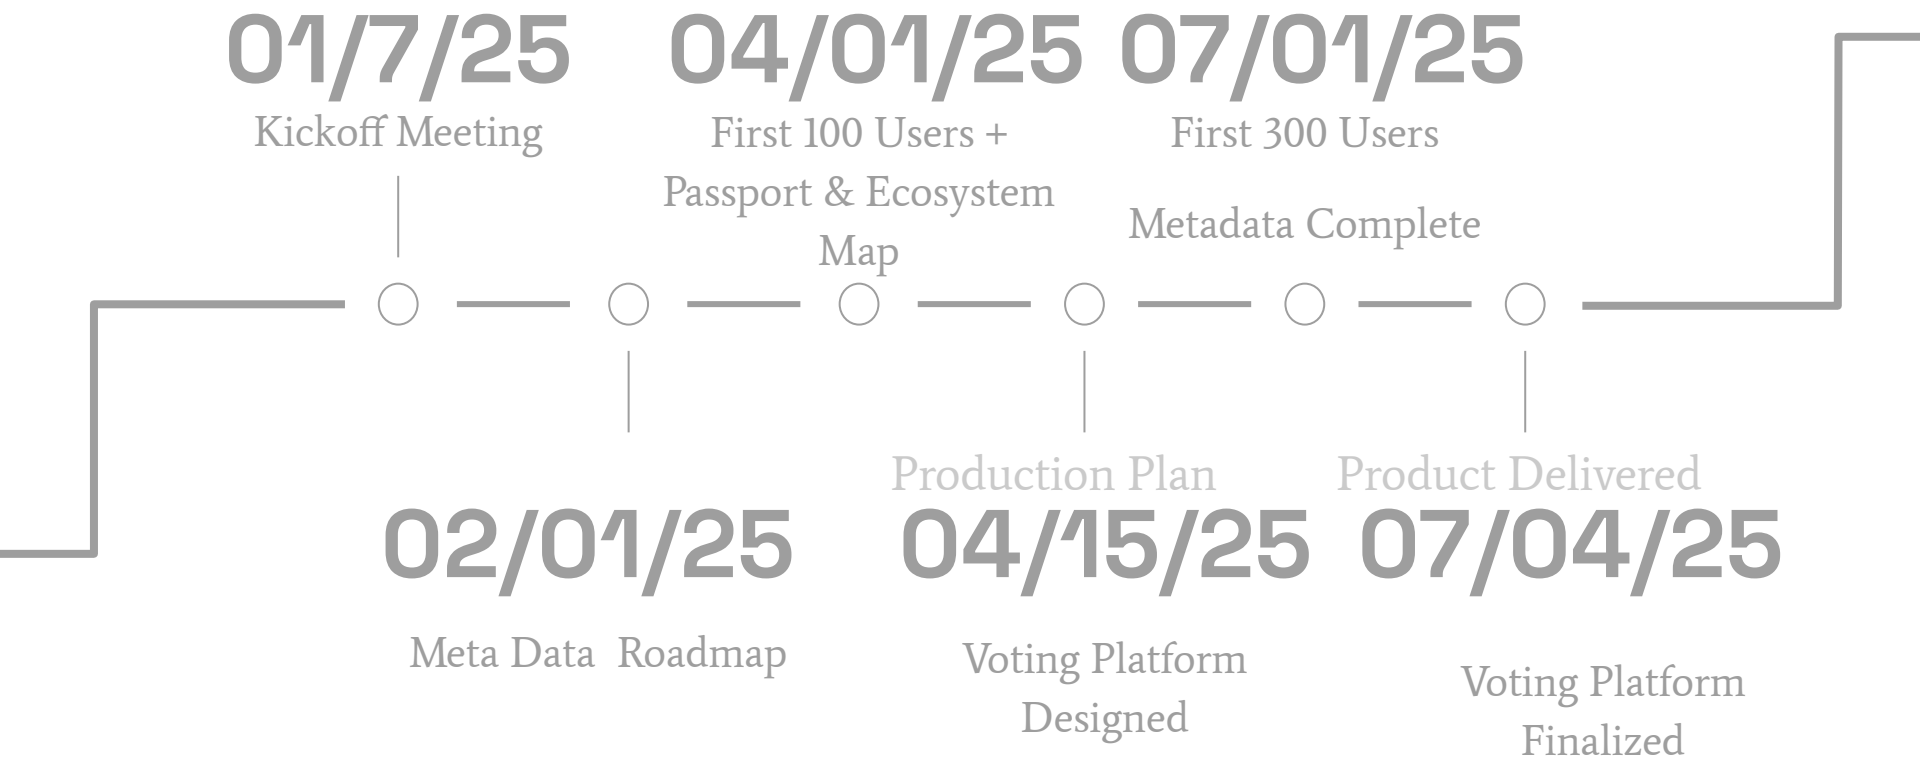

04

Internal Voting Platform

- Soul Bound “Passport” NFT’s allow users to possibly vote anonymously?
- Allows for DRep coordination in case of attacks.
- Collectivize to get paid and have legal protection.

Ideas & suggestion

Template

Offchain: Possible Voting Bylaws

Voting bylaws can be used to drive the ecosystem in several directions:

- Can increase participation
- Can make sure we get the threshold to propose our own governance actions such as a treasury withdrawal for funding
- Can protect the community from outside influence
- Can help foster discussion if people know they have to vote
- Can act as a way to make sure delegates get good service
- Creates a good reputation
- Can purchase legal protection
- Easy Onboarding

Tier 1 Voting Requirement

To remain in the collective you must vote on a gov action deemed tier 1. Tier 1 voting actions are considered attacks on the chain such as a sybil attack or massive treasury withdraw from an entity such as binance.

Tier 2 Voting Requirements

Tier 2 voting requirements are proposals such as new constitutional committee members or new constitutions. It doesn't matter who or what you vote for but you must vote yes/no.

Tier 3 Voting Requirements

Can vote yes/no or abstain but must vote.

Tier 4 Voting Requirements

Can vote or not vote however one pleases.
