

# Welcome to The DRep Collective

Meeting #15

# Highlights From Last Meeting

1. CIP & Budget Proposal

# Agenda

1. Intro and review highlights (5m)
2. Metadata and web app feedback (45m)
3. Critical workstream updates (10m)

-

# Introductions

# Workstream Updates

## Metadata Standards

Defines and refines how dRep data is structured, stored, and shared for consistent governance tools.

### Updates

- I have local changes to the CIP that need to be pushed to the repo. Almost done of a slight refactor based on comments on github

### What's next

- Continue to go through feedback on github and work on getting CIP passed

### Needs

-

## Front End

Designs and develops the user-facing interface, focusing on clarity, usability, and a smooth experience for ADA holders.

### Updates

- None this week

### What's next

- Implement new standards after passing on cf github.

### Needs

- Confirmation of our CIP standards

## Back End

Implements the server-side logic, database schemas, and APIs that power the governance tools and data flows behind the scenes.

### Updates

- Initiated development of a scalable and robust backend, with the current ad-hoc backend serving as a prototype/proof of concept (PoC) to refine API design and functionality.

### What's next

- Finish completing of the scaling of fees charged for long-winded self-reporters
- Ensuring that every data point has meaningful purpose and translates to an impactful Map data Points.

### Needs

- Clear alignment on frontend requirements to structure API endpoints effectively.
- Validation of metadata standards to ensure backend compatibility and data integrity.

Kevin

## Coordination

Oversees cross- team communication, tracks milestones, and ensures priorities stay aligned.

### Updates:

- Meeting with CIP Editors
- Meta-data standards & roles document

### What's next

- 

### Needs

- Outline Website

Ratio

## Github

### Updates: NO UPDATES!

- Created new document in GitHub recording the User-Journey meeting
- <https://github.com/DRep-Collective/Landing/blob/main/docs/projects/website/user-journey.md>

### What's next

?

### Needs

- ?
-

Ben

# Ecosystem Mapping

Catalogs and visualizes all dReps, initiatives, and related projects so voters can easily navigate and connect.

## Updates

- 

## What's next

- 

## Needs

-

Matthew

## Media and Socials

Manages community outreach and updates (social media, announcements, etc.) to keep stakeholders informed and engaged.

### Updates

- Pulling back to focus on education.
- Available still this week.
- 

### What's next

- 

### Needs

- 
-

Matthew

## Partnerships

Builds and maintains relationships with external collaborators—identifying new opportunities and integrating them into the project's growth.

### Updates same as last week

- Conversation with Tempo Vote

### What's next

- 

### Needs

-

1. Rationale - How When Where
2. Current Events - Ecosystem Updates
3. Forum and Collective -
4. DRep Collective - Intent, Self Identify
5. Meeting Attendees/Members - Identify Intention or Representation?
- 6.

## General Items

Template

Template

## Data that Changes

- Smart contract to be able to represent a vote yes or no with a datum. (Voting Tool)
- Stamps on Passport (NFT)

## Not Sure Yet

- DRep I.D. as Passport Name?
- Mintable Map/Airdrop

## Problem Statement

Cardano's ecosystem faces a human interoperability challenge as it transitions to full self-governance. The core issue: How can community members, especially potential Decentralized Representatives (DReps), effectively represent and contribute to a community they can't fully see or understand?

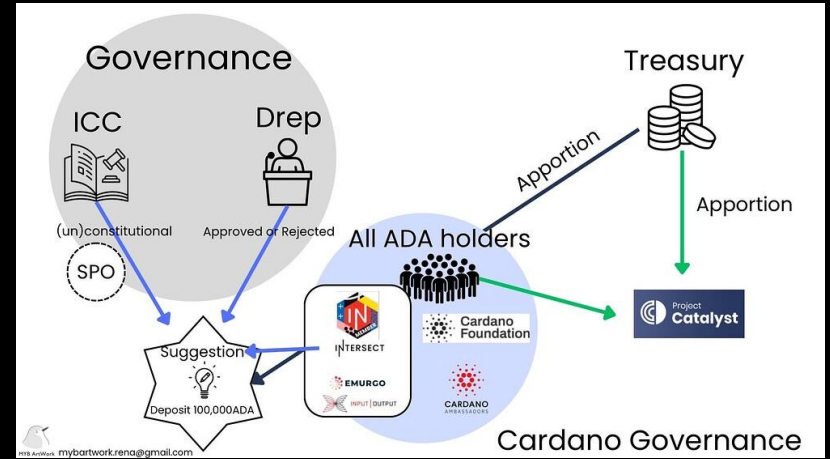

## Problems

Limited visibility: DReps struggle to engage with unknown community members

Representation dilemma: Difficulty in representing an incompletely understood community

Proximity bias: DRep's understanding is often restricted to their immediate networks influenced by factors including region, language and the roles in the industry the DRep plays

Role ambiguity: Unclear delineation of DRep responsibilities within the ecosystem

# 01

## Metadata Standards

- CIP - 0119
- CIP -1694
- CIP - 0100 (Expand Upon)
- Base Layer vs Changeable Layer

# 02

## Ecosystem Map

+

- Interactive Map
- Educational & Informative
- Corresponds to various Gov actions on gov.tools.
- Updated Yearly or Quarterly as needed
- Human Sensory Networks
- Airdrop

# 03

## Voting Passport

+

- Stamps for Voting
- Stamps for different ecosystems explored
- Annually Renewed

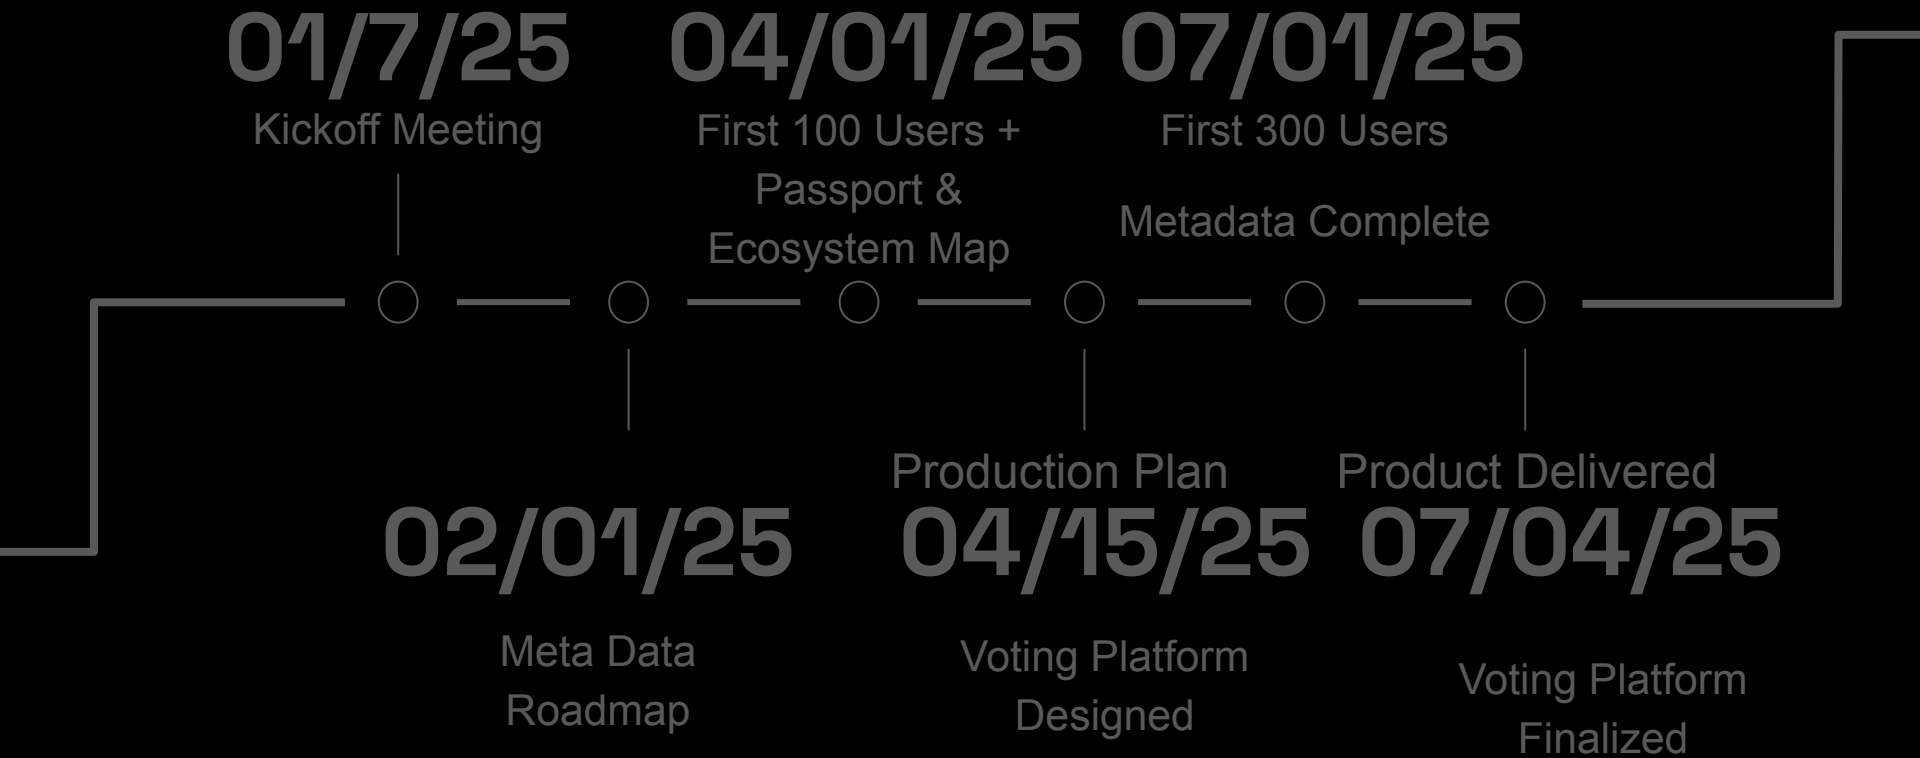

# 04

## Internal Voting Platform

- Soul Bound “Passport” NFT’s allow users to possibly vote anonymously?
- Allows for DRep coordination in case of attacks.
- Collectivize to get paid and have legal protection.

# Ideas & suggestion

# Template

# Offchain: Possible Voting Bylaws

Voting bylaws can be used to drive the ecosystem in several directions.

- Can increase participation
- Can make sure we get the threshold to propose our own governance actions such as a treasury withdrawal for funding
- Can protect the community from outside influence
- Can help foster discussion if people know they have to vote
- Can act as a way to make sure delegates get good service
- Creates a good reputation
- Can purchase legal protection
- Easy Onboarding

## Tier 1 Voting Requirement

To remain in the collective you must vote on a gov action deemed tier 1. Tier 1 voting actions are considered attacks on the chain such as a sybil attack or massive treasury withdraw from an entity such as binance.

## Tier 2 Voting Requirements

Tier 2 voting requirements are proposals such as new constitutional committee members or new constitutions. It doesn't matter who or what you vote for but you must vote yes/no.

## Tier 3 Voting Requirements

Can vote yes/no or abstain but must vote.

## Tier 4 Voting Requirements

Can vote or not vote however one pleases.
