Workstreams & Forms

Procedure

1. Workstream owners add bullet points to the format.
Highlights from last week (organized by workstream).
2. Workstream Owners Updates
 - a. Current progress
 - b. What's next
 - c. Needs and opportunities (call for support)

How it works

1

Example: Front End Development

Development

From Alpine:

- CIP page has been updated with some FAQ for ongoing concerns and updated metadata based on the docs from @benohanlon
- Added Browse Drep page with generated eco map based on metadata and clickable nodes for dreps (click on the pink nodes)
- Added DRep page by id, with a breakdown of cip148 metadata and a simple diagram based on each user
- Added "self report as DRep" form. (very basic, hoping it sparks some discussion)
- added some mobile safe updates but non tested

Any Other Development Updates?

???

Github update?

Social Outreach
